

# Scafell™

*lite*

revolutionising the arb industry

# the Scafell Lite, why it's so popular

The Scafell Lite has become a leader in the forestry and arb industry, this is through you, our consumers, consistently proving that the boots work and last. With so many advanced features it has become the chainsaw boot to try to imitate. There is only one **Scafell Lite!!**

## key features & benefits

- **Handmade** The Scafell lite is a very robust premium leather boot handmade from the finest italian materials.
- **Class 2** With full class 2 protection they are perfect for forest and arb industries, climbers and groundies.
- **Support** It is particularly important to have the correct support to reduce foot fatigue, scafell lites are also fantastic for spike work, climbing and forest work.
- **Comfort** Following an initial period of breaking in, they are extremely comfortable while still maintaining the correct support and durability.
- **Anti-perforation midsole** Gives you full protection from sharp object such as nails & needles.

- **Waterproof & breathable** As well as keeping the water out it is also very important for the feet to be able to breathe well. With the Breathedry lining, providing you maintain the boots correctly, this is guaranteed.
- **Vibram sole** Very grippy and hardwearing rubber sole unit
- **Gaiter** Provides extra comfort & stops debris getting into your boots.
- **Randing** Rubber randing gives protection from scuffs, scratches and wear and tear
- **Rollerball lacing** The rollerball lacing stops rubbish getting caught in the eyelets and allows you to quickly and freely lace up the boots
- **Socks and laces** Each pair includes complimentary technical socks and spare laces. We recommend watching the videos (info on the back) which show correct lacing technique and how to wear your boots.
